

The divine Plan for the new era hinges on the establishment of a reciprocal relationship between the Hierarchy and humanity.

~29 October 2020~

The Divine Plan is not a document engraved in stone. It is a living, breathing confluence of energies that moves in a particular direction in accord with Divine Will and in response to ever-changing influences and impacts. It is the subtle fabric of living substance woven out of infinite possibilities and influences, including the sun's cyclical journey through the heavens. The Plan is life itself, as lived by billions of human beings, only a few of whom are as yet sensitive to higher impression, and by Those in the spiritual Hierarchy who are striving to reach human minds and align those minds with planetary purpose. Since the time of Atlantis, only a small handful of individuals incarnate at a given time—out of thousands, then millions and now billions—have been impressible by members of the Hierarchy. What is occurring for the first time since the emergence of the race is that the mind of humanity has begun to turn toward higher realities, including the fact of an evolutionary plan. *~6 September 2019~*

Between now and the time when members of the Hierarchy become visible to many, dramatic events will continue to shake the world. It will be helpful to view the shocks and aftershocks as part of the divine Plan. Their purpose is to shake loose the elements of the old order that block the forward thrust of evolution. Before new structures can be built, the remaining pillars of the old order must be swept away. In the future, as the new age gives birth to an Aquarian civilization, the adjusting of human will to divine purpose will influence every aspect of life. ~19 November 2020~

The work of restoring the divine plan on Earth involves communicating the factual nature of a subtler dimension of planetary life inhabited by conscious Beings concerned with the fate of Earth and all its creatures in all dimensions. These Beings have outgrown the appetites of the lesser self. They have realized the hollowness and destructiveness of free will directed in service only to the separated self. They have recognized the workings of the Law of Karma and removed themselves from its grip. These Beings have merged with the Love, Truth and Purpose that pervade the spiritual realm of Earth. In this higher realm, where humanity's spiritual elders dwell, individual free will has been transformed into the will to cooperate with the evolutionary purpose of the Planetary Logos. The incessant drive for self-preservation and self-aggrandizement, the root of all human misery, is supplanted by the realization that the self is a cell in the body of a Greater Life. This Life is now seeking to deliver itself from the endlessly repetitive cycle of human activity rooted in the 'sin of separation.' ~30 August 2019~

It has been written that joy is to the soul what happiness is to the personality, and that bliss is to the monad what joy is to the soul. If you can imagine it, there is a stage beyond the bliss of the monad that encompasses the whole of

planetary life: the unparalleled bliss of the Logos, a state that transcends language. What gives rise to it at the present time is the realization that the fulfillment of the Plan for humanity is at hand; that millions of years of human evolution through conditions of perpetual pain and suffering are beginning to bear fruit. We are witnessing the first rumblings of the human soul awakening from deepest sleep and taking on the mantle of responsibility for its home, the Earth. ~11 October 2019~

The shift now taking place was precipitated long centuries ago in the higher dimensions of planetary life by Those who anticipated this crucial turning-point in evolution. To assign a timetable to this Great Event is to see it as a singular occurrence, whereas it is in fact a process of exceedingly long duration culminating in the current awakening of the human soul.

The new wave of unfolding consciousness was initially sparked by the esoteric works of Helena Blavatsky, Alice Bailey and Helena Roerich in the last century. These were followed by innumerable writings and teachings of differing degrees of light. These latter teachings poured out from around the world and included the influx of swamis from the East who settled in the West. Popular figures like the Beatles who adopted Eastern teachings contributed in their own way to the shift in consciousness, as did the swarms of ‘new-age’ gurus.

Behind all of this activity are higher forces—within Shamballa and the spiritual Hierarchy—that unleashed the streams of energy that have been clearing the path for a new era of spirituality that requires the cooperation of awakened human souls. By subtle means, they have been impressing human awareness with the need to rise from the ‘tomb of matter’ and enter the realm of living souls. You can judge for yourselves how successful this aspect of the Plan has been. ~17 November 2020~

Below are some of the key points We seek to convey to awakening humanity.

- First, the death of the current world order is the prelude to the birth of a new civilization and culture that will be born of a new spiritual awareness.
- Second, the light emerging from the awakening soul of humanity will transform the darkness shrouding the world as this cycle of evolution comes to an end.
- Third, when the spark of the human soul is ignited by the fire of the Kingdom of Souls, a new world is inevitable.
- Fourth, a Divine Plan lies behind the converging streams of energy that are creating planetary upheaval on the eve of a radically new era.
- Fifth, now is the time to prepare mentally and spiritually for the impending shift.
- Sixth, a Great Being will come to light up the world and inaugurate a new era — for those with eyes to see. ~ 5 November 2020 ~

World Events Reveal Signs of the Plan

Humanity is on the verge of a great resurrection of Spirit. The first signs are appearing through a growing resistance to the present world order. Throughout the world there is a rising hunger for goodness, beauty, and truth. How does the light of truth enter a world where money rules and where monetary forces subvert the values that nurture the life of the soul? The world must be made anew from the unfoldment of the higher consciousness of humanity. ~21 April 2019~

Human activity has become a threat to planetary life *for the first time since the formation of the Earth*—billions of years ago. The massively destructive aspect of human power appears daily in headlines around the world. Invisible to the mass media, however, is the shift in consciousness that will soon establish a new planetary reality. In time, the creative aspect of human power will take hold as humanity develops the higher intuition, a capacity so new as to be almost entirely unrecognized. This capacity will enable the collaboration between the 4th (human) and 5th (spiritual) kingdoms which will foster a new civilization. This is what will result from this momentous shift between the ages. ~31 May 2019~

Changes taking place within the outer crust of Earth are breaking up conditions that have crystallized over countless millennia, and are allowing light from higher realms to filter into human awareness. Current events are serving to arouse the higher Self, which has been lying dormant throughout innumerable cycles of Earth's evolution. Higher Beings are approaching closer to guide humanity through this tumultuous wave of change and reveal the incredible potentials of the race. ~20 September 2019~

The effects of the pandemic on the life of Earth have accelerated humanity's awareness of what it means to be 'our brother's keeper.' It has pruned open the heart of the race to the immensity of human suffering. When the planetary shift occurs, a much greater proportion of souls will have personally encountered the reality of interconnectedness and will thus be prepared for the life of the new world. ~15 February 2021~

One of the most salient characteristics of these ‘end-times’ is the dissolving of barriers in every sphere of life that have served to mask Truth, including the true Self of the human being. Those barriers will fall away ever more rapidly now and in the greater transparency that results, the externalization of higher truth and light will accelerate.

It is our mandate to penetrate the veil from our side and to make it known to humanity that we exist, and that the divine plan of evolution is unfolding as it must—in and through these dire world conditions: ~3 June 2021~

As planetary conditions deteriorate, the human gaze will increasingly turn inward and upward. This will be a test of inner spiritual resources unlike any other—a litmus test of the presence or absence of soul awareness. For those in whom the light of the soul is glowing, it will be a test of the courage to lead the way into the unknown, guided by the light of the inner Ashram.

It is through these dire happenings that the Plan is working out. You will have noted by now the many extraordinary human beings who embody courage in the face of extremely grave danger, selflessly serving their sisters and brothers. You will have noted the countless acts of love and goodwill, the determination to spread the love and joy of the Soul. You will have noted the outpouring of wisdom to lift the human spirit.

All such acts contribute to preparing the way for the Christ’s reappearance. Collective preparations are taking place everywhere, most visibly via the internet. As the noise of the outer world subsides during this pandemic, every message, email, letter, and call takes on added meaning and significance—for those who seek the light of understanding. The ‘intelligentsia’ is searching desperately for clues to what will follow. The spiritually awakened sense the end of the age and are looking for signs of the new. The wise are filled with quiet expectancy, knowing the Coming One is edging closer to visibility. ~26 March 2020~

Foundations of a New World

To integrate the reality of the Spiritual Hierarchy, and to comprehend its role as the agent behind the creation of a new world, requires adjusting one's own sense of significance. This is essential in order to see the individual and the entire human species in right proportion to the Greater Life. It is this adjustment and consequent attunement of the personal will to Hierarchical purpose that is crucial in laying the foundations of the New World.

~20 October 2018~

We are witnessing the old order falling on its sword of division and separation. For most of humanity, a higher destiny awaits. As events unfold, forces that were quietly amassing in the subtle realms will increasingly enter the plane of visible manifestation. Great Ones will soon appear. Everything occurring on Earth is part of a divine Plan that will, in time, release humanity from the chains of matter and open pathways into spiritual realms. The ascent of the human soul to a plane of higher consciousness is the evolutionary goal of the Aquarian age. This age has already begun. *~16 August 2019~*

The power to actualize a new reality has begun to unfold within advanced humanity. This is the power latent in Mahatma Gandhi's evocative words: 'Be the change you want to see in the world.' Over time these words have become a slogan, losing their original potency, although they are still heard by many as a call to action. For the more awakened, they can be heard as a directive from the Soul to the persona: to change the world by transforming oneself from a human being into a spiritual Being. That is the overriding mandate of this critical hour. It is the call — embedded in the plan of evolution

for Earth — for humanity to begin to manifest its inherent divinity.
~3 September 2020~

Just as development of the extraordinary potentials of the human mind was the evolutionary goal of the Piscean Age, the development of the potentials of the human soul is the goal of the Aquarian Age. The promise of transforming our planetary life lies in the soul's capacity to collaborate with the Kingdom of Souls and align with the plan of evolution. ~6 December 2019~

The divine plan for the new era hinges on the establishment of a reciprocal relationship between the Hierarchy and humanity. The light streaming forth from the spiritual kingdom will become a saving force *only if* it finds responsiveness in the human soul. The soul's passage into the new age is made possible through recognition of the light of Truth.

No demand for reciprocal action was ever placed upon the shoulders of humanity before. In previous epochs, when Great Ones emerged from the spiritual kingdom at times of dire necessity, there was no requirement on the part of human beings to discern Truth or align with the Source of Truth. But it is central to the Plan at this momentous turning-point for humanity to wake up to its responsibilities within the planetary Life. ~29 October 2020~

It is a part of the Divine Plan for the human kingdom to discover the limits of free will exercised in the illusory consciousness of separation. This has

begun. We are at the start of a new cycle in Earth's evolution during which awareness of the existence of a divine plan will reassert itself, but not through statements in sacred scriptures. This time the Plan will be actualized through the cooperation of the human and spiritual realms. It is humanity's destiny for individual will to become aligned, *over time*, with the purposes of the Logos. In the future, kingdoms, realms, and dimensions of life will increasingly intersect and interact. The Plan will be restored by means of the immersion of 'lesser realms' of life in the light of Spirit flowing from the subtler realms. ~30 August 2019~

Forces of opposition to the status quo have been recognizing one another across the globe and finding strength in their mutual resistance to current systems and structures. The Soul of Humanity is breaking free of crystallized forms to meet the light of the new world. The people's movement that has been unleashed cannot be suppressed for long. While these protests create chaos and bloodshed, they are also part of the great planetary awakening that has been stirred by the forces of evolution. They are as integral to the planetary shift as the cataclysms affecting every corner of the globe.

At their core, these mass protests embody a demand for the restoration of human dignity. The particular issues that ignite the protests will differ, but it is the soul of the people arising and struggling for an end to injustice, inequity, and inhumanity. Countless thousands are willing to risk their lives to bring an end to the enslavement of their souls. Awareness is growing that money cannot be the aim of human life, especially when earning it destroys the dignity of the Self. This recognition is spreading rapidly, awakening a sleeping giant, and eroding the grip of the monied interests. It is stoking the fires of liberation that compel the soul to speak and act. This is not anarchy, violence for its own sake, but exposure of the dark side of human living that allows the strong to dehumanize the weak. ~8 November 2019~

We would turn your attention to the impact of this planetary crisis. Seemingly overnight, the condition of quarantined populations has vastly accelerated spiritual developments—the awakening of many more souls to higher truths and values and, for those already awakened, a further shift from personality identification to the life of the soul. We are witnessing, *en masse*, an initiation of humanity into spiritual realities.

Consider these facts:

- The attention of a large portion of advanced humanity has been drawn away from the external world, providing the opportunity to explore and deepen the inner life.
- Values are being reassessed as people consider what is actually needed to live as opposed to what is desired.
- The fact of human interdependence is seeping into awareness as the realization dawns that physical survival depends on mutual adherence to rational rules of behavior.
- There has been a growing awareness of the fragility of the human species, through its vulnerability to a virus. This has stirred a sense of fellow feeling—a forerunner to genuine brotherhood.
- Selflessness, courage, and self-sacrifice are being lauded in the news media, while the selfish and greedy excesses of the rich are being exposed.
- Public servants, health workers and all workers who have been greatly undervalued in monetary terms, and in terms of societal respect, are becoming most valued for their role in sustaining human lives.
- Exposing truth in public life is no longer a distant ideal but is being rightly regarded as a matter of life and death.
- Superficial outer appearances are losing meaning as life is being lived indoors, re-focusing attention on things that matter.

- Affinity groups are replacing relationships based on work and social traditions, allowing the soul to explore connecting with kindred souls who share vision, values and perspectives.
- The heart of humanity is opening as never before. Expressions of spiritual love proliferate as compassion spreads to embrace strangers.

These are but a few spiritual advances achieved in a matter of weeks in many cases. They are by no means anchored in consciousness and will require repeated reinforcement, yet they are now part of the collective experience of human beings across the planet. If anyone has needed proof that the Plan is unfolding as foreseen, here you will find fingerprints of divinity. In coming weeks, you will see a battle brewing for the restructuring of human value systems, as groups of more awakened souls extend their reach toward the principles that will undergird the new civilization. Over time, a system of justice and fairness will emerge through the growing influence of the human soul. *~16 April 2020~*

There are many human beings on our planet who have awakened to the Soul, if only semi-consciously, and they are responding to the soul's urge to serve the greater good. At this dire moment, they need to know: 1.) in spite of all outer appearances, a plan of evolution is unfolding toward the light of a higher reality; 2.) the planet is on the verge of moving into a higher vibratory sphere where soul consciousness will become the directing force in human affairs; 3.) enlightened Souls, wise Beings who have evolved beyond the life of the 4th kingdom, are guiding Their younger sisters and brothers to take a momentous leap into an entirely new realm of consciousness and life. *~13 September 2019~*
