

"Living through these Times as a Soul"

A Dialogue on Spiritual Living

The Soul of Humanity has a specific destiny in the Grand Design for the coming age: to serve as divine mediator between the Kingdom of Souls and the lesser planetary kingdoms.

This service involves creating the inner span of light along which telepathic impression about the divine Plan is transmitted and received.

The light received by humanity from the spiritual kingdom will in turn nourish the hidden capacities of the animal and plant kingdoms.

It is not an overstatement to say that the evolutionary Plan for the Aquarian Age hinges on humanity's realization of its divine potential and its ability to transform this potential into an enlightened force for planetary evolution.
