

A CYCLE
OF
ENLIGHTENMENT

In the coming age, the radiance of the soul reflected through its etheric form will be clearly visible to virtually all inhabitants of the new world through etheric vision. There will be no question of where an individual stands on the Path by dint of the light of their soul or lack thereof.

By this means the hierarchy of light will present itself to observers at every stage of the path of evolution. No longer will masks or veils occlude the truth of a person's character; the truth will stand revealed in degrees of light and shade.

By this means, leaders in all fields of service will be selected —not by vote or popular choice but by simple acknowledgment of the light of the soul as evidenced through the manifestation of love and wisdom. The Aquarian civilization will be dedicated to embodying light, a goal that no previous world civilization could even have contemplated.

The watchword of the culture, if we can call it that, will be 'to enlighten.' The goal of those who consciously serve will be to share whatever measure of light they have accumulated with those not yet at their stage, while reaching up and being served by those who have traveled further toward the Light.

To glimpse the constitution of life in the new world of the new age it is essential to clear your minds of any notion of life based upon present and past activities as there will be little resemblance between what was and what will be. That is because human consciousness will be released from the illusion of materiality to play its rightful part in planetary evolution.

A NEW ERA

If you can grasp the possibility of a starkly different outer reality,
you will be able to sense what we wish to convey about the
meaning of life in the new era.

Most of what has given meaning to people's lives in the age now ending has been the accumulation of wealth, material goods and success in the form of accolades. The higher aspect of human consciousness has been obscured by the quest for material advancement in most societies, rich or poor, until wars and natural disasters have come along to pry open the human heart for a time.

In the new era, that which has served to obscure will not exist in its present forms. In its place will appear the vast hierarchy of light and shadow to which we have referred.
