

ENTERING THE
AGE
OF LIGHT

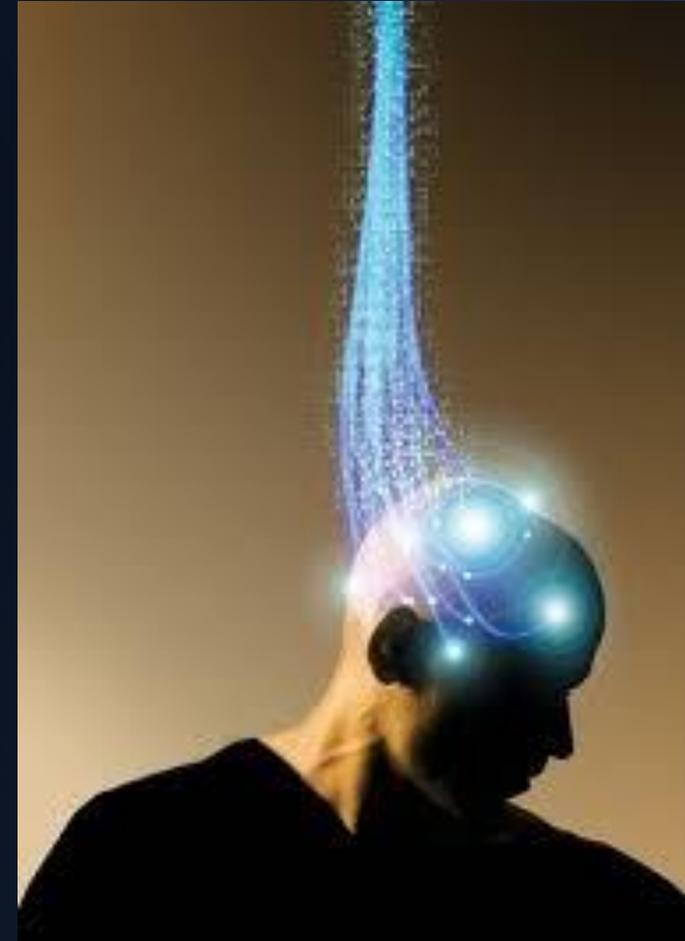

The crowning jewel of this long epoch of evolution is the development of the human mind. As many have come to realize, the word 'mind' comes from the Sanskrit 'manas', the origin of the word 'human' as well as 'man' and 'woman'. The race was named with the potential to think as its central characteristic, although the capacity for independent thought is only now within the reach of the majority of human beings. This is a recent development after millions of years of human evolution.

We now enter a period in which the mind will no longer be the ultimate organ of perception for advanced humanity. We enter a stage wherein the faculty of perception known as the intuition will replace the greatest attributes of mind as a means of knowing. This will occur as soul consciousness evolves and the mind comes under the control of the soul, whose essence is love.

At a given stage of evolution, the awakening soul transcends the limits of mind and develops capacities that link it with the spiritual kingdom. One such capacity is the perception of Reality that bypasses the mind.

A close-up, low-angle shot of a person's face looking upwards. The person's nose, mouth, and chin are visible, with their eyes looking towards the top of the frame. In the background, a seagull is flying in a bright, overcast sky. The overall tone is contemplative and serene.

To phrase it differently, there is a finer sensibility in the human being than even the higher abstract mind. It is called higher intuition to distinguish it from instinctual or astral intuition. The development of higher intuition forms a bridge between the human mind and Universal Mind, also known as the Mind of God.

To access this stream of subtle communication requires the light of the soul. As the soul's light increases, so does the light of intuition. The interplay between the two produces illumination.

We bring your attention to this higher stage of evolution in order to present the backdrop for these writings as well as to describe the mechanism by which they have been written.

The disciple who worked with Us did so by ‘downloading’ information transmitted by Us from the plane of intuition, known also as Buddhi, the realm of Universal Mind.

From this plane We work telepathically to impress the minds of a number of human beings with elements and principles of the coming age.

We have two primary goals in transmitting this material. The first is to prepare individuals at the forefront of the ascending wave of evolution to meet the onrush of events that will clear away structures of the old order and initiate the collective passage into the new order of light. The second is to demonstrate one of the methods by which future communication will take place between Us and those with whom We will work to create the new civilization and its culture.

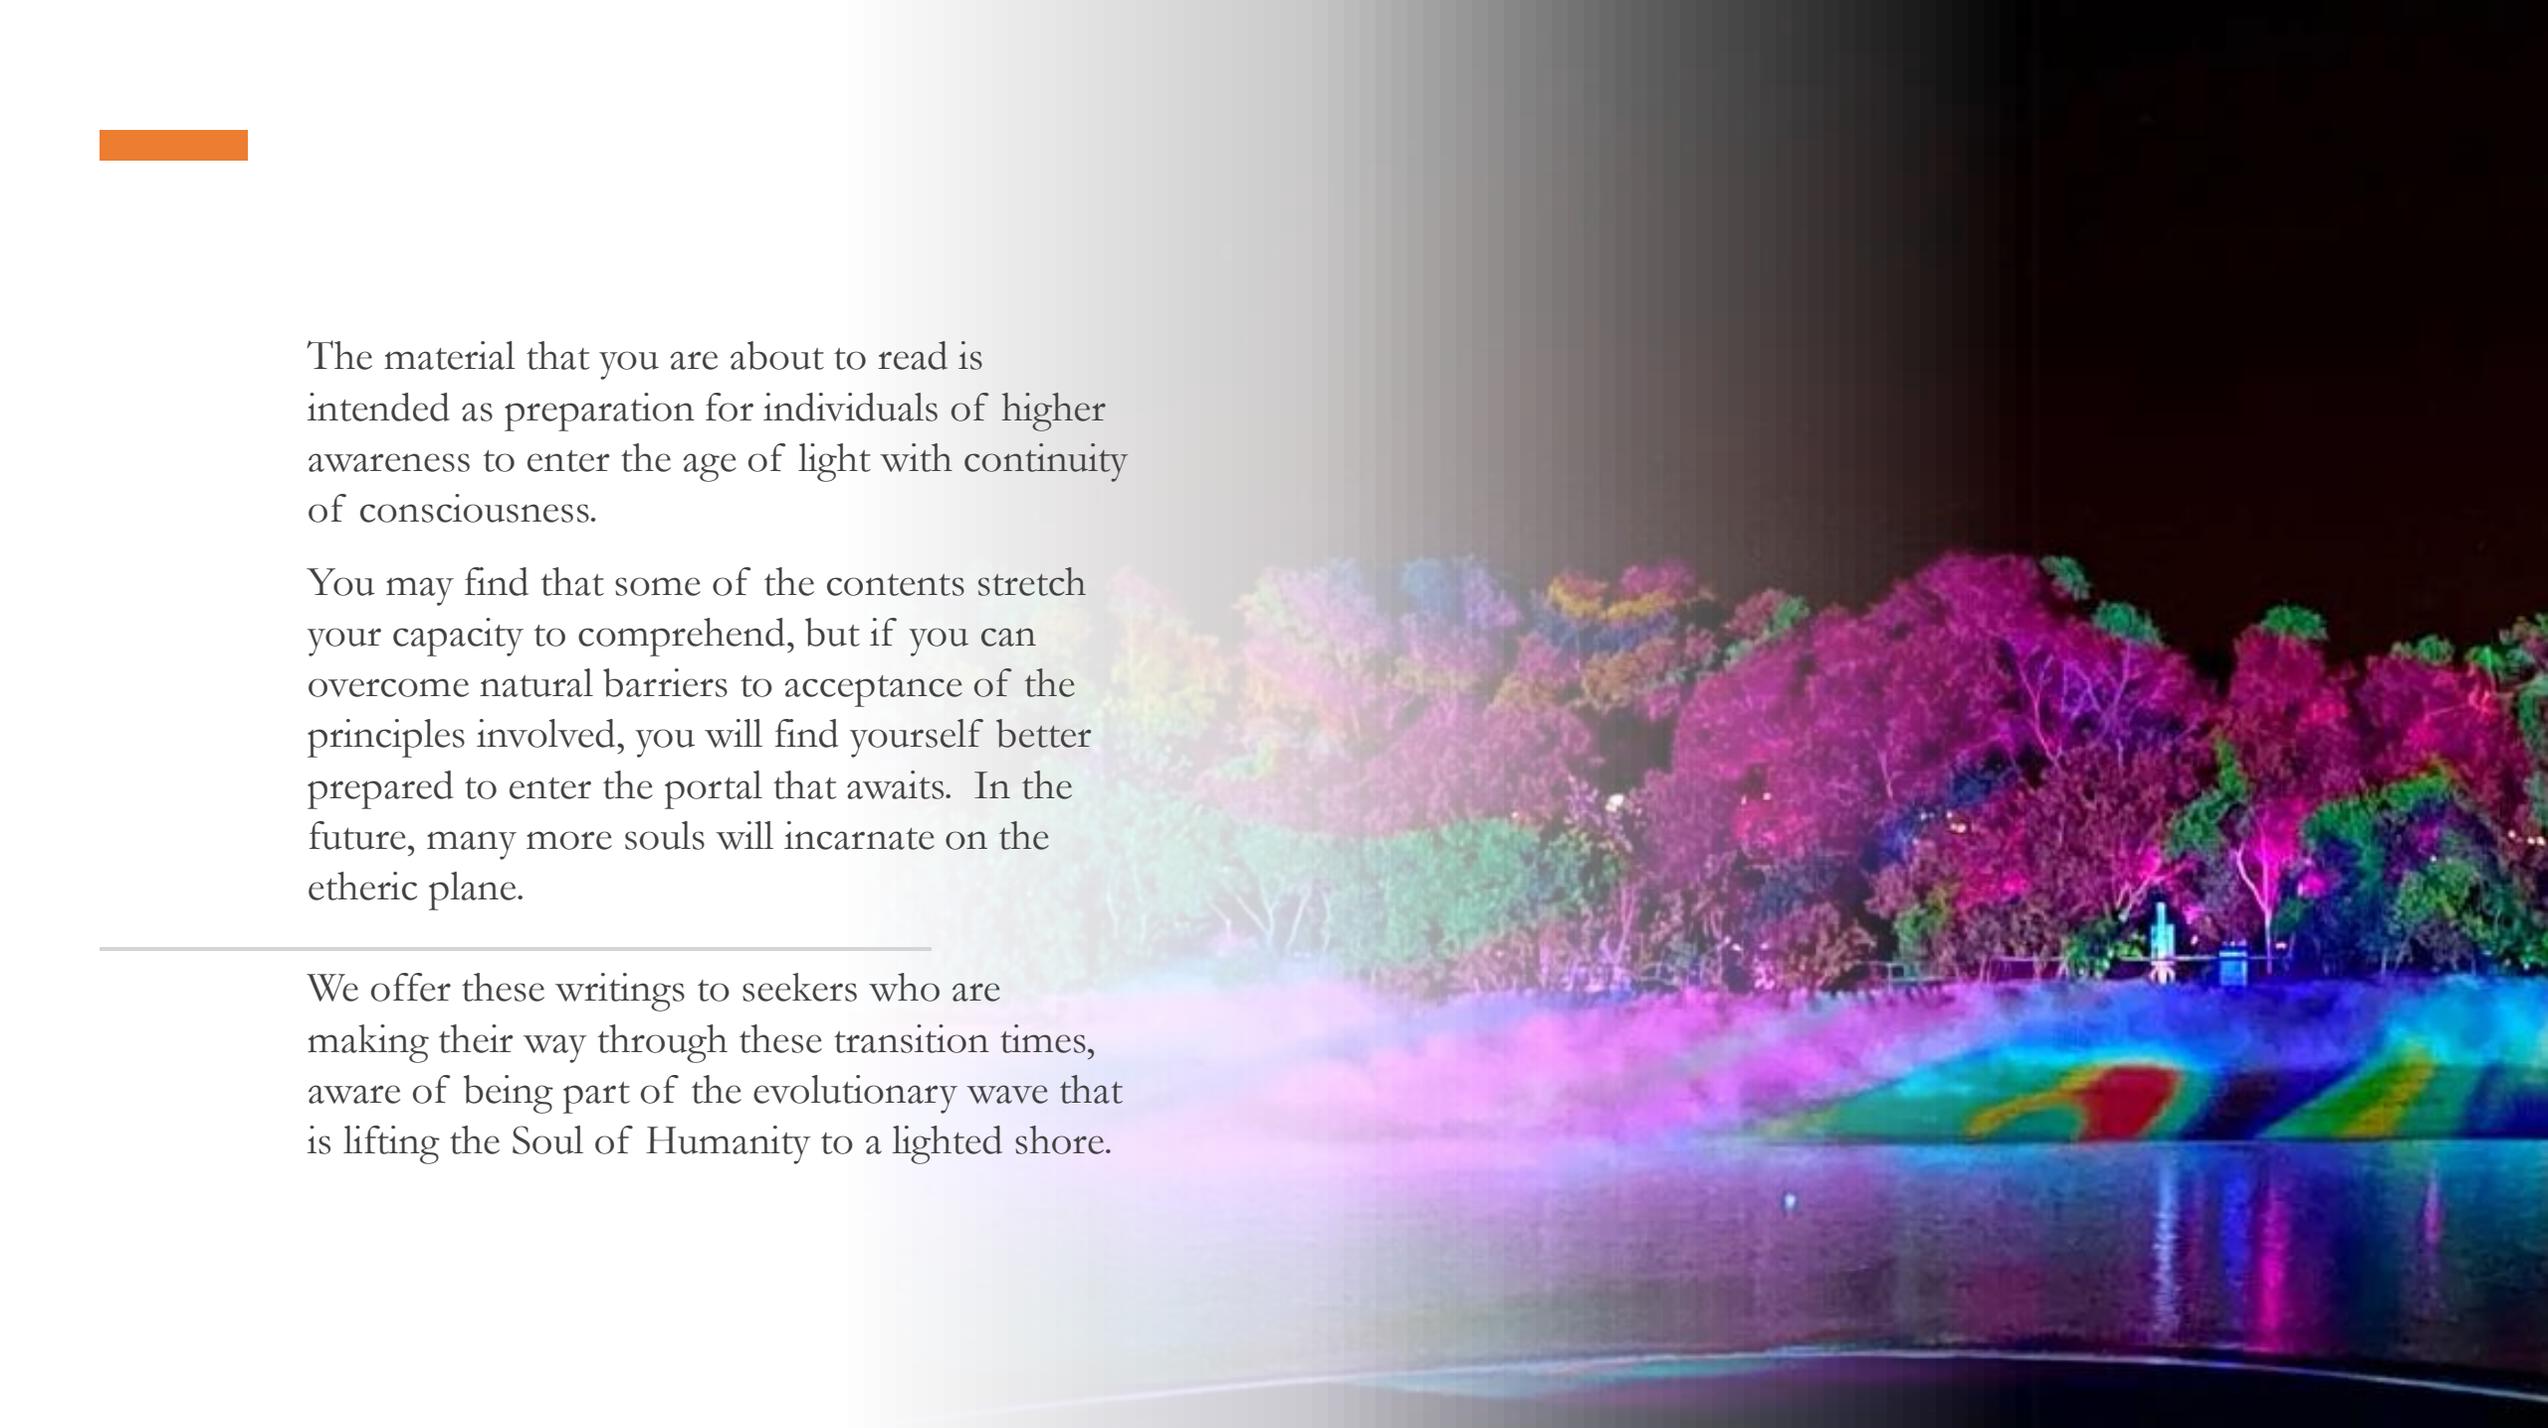

The material that you are about to read is intended as preparation for individuals of higher awareness to enter the age of light with continuity of consciousness.

You may find that some of the contents stretch your capacity to comprehend, but if you can overcome natural barriers to acceptance of the principles involved, you will find yourself better prepared to enter the portal that awaits. In the future, many more souls will incarnate on the etheric plane.

We offer these writings to seekers who are making their way through these transition times, aware of being part of the evolutionary wave that is lifting the Soul of Humanity to a lighted shore.

We, the authors of this text, are members of the spiritual Hierarchy of Earth and guardians of its evolutionary unfoldment. Our presence in the planetary life will become increasingly familiar as humanity enters the new era. This document is intended to help seekers across the subtle bridge to the dimension where evolution will continue.

Our amanuensis (telepathic receiver) is a disciple whose outer body would attract no attention in a crowded marketplace, but whose inner body of light reflects lifetimes of searching for higher truth. To the inner eye, the difference between us lies primarily in the degree of light emanating from the form. There is a total unanimity of purpose. Together we offer this work in service to humanity at this momentous time.
